

Dear Patient,

Please follow the instructions below to transfer your medical images to your physician at Pacific Neuroscience Institute via Ambra Health.

Ambra Health recommends using Google Chrome. Chrome and Firefox do not require Java for upload. Ambra recommends the most recent versions of Adobe Flash and Java when using Internet Explorer. They can be downloaded at [adobe.com/flash](http://adobe.com/flash) and [java.com](http://java.com) respectively.

In order to upload your images, you will need access to the internet and a current web browser installed on your computer.

Please download the above software to your computer if using Internet Explorer. It should take only a few seconds.

**1. Navigate to the following site using the link below:**

<https://pni.ambrahealth.com/link/2a715ad9-37f6-4051-b461-056a58ddf4e6>

You may be prompted to allow the application to run on your computer. Click to accept terms and hit run.

2. Insert your image disk or thumb-drive into your computer.
3. Click “Choose File” and then select the file(s) you wish to upload.

4. Once you've selected the file, click “Upload”.

The system will scan for DICOM objects on the file path you selected. This may take a few minutes. Once the scan is completed, you will be presented with your files for upload.

The screenshot shows the 'ImageShare' upload interface. At the top, it says 'ImageShare' and 'Upload medical images, image reports, surgical reports, pathology reports and/or lab reports with Pacific Neuroscience Institute'. Below this are two steps: '1 Select your image CD or file' and '2 Upload and share your images'. The main section is titled 'Choose your images to upload and share' and contains a table with columns: Description, Images, Patient Name, DOB, Modality, and Study Date. One row is selected, showing 'MR SPINE', '368', 'ANNE\*JAY\*SMITH', '01-01-1980', 'MR', and '08-19-2008'. Below the table are several form fields: 'First Name\*' (text input), 'Last Name\*' (text input), 'Preferred Method of Contact' (dropdown menu), 'Symptoms & Diagnosis\*' (text input), and 'Optional Field' (text input). At the bottom, there is a checkbox for 'I understand this study will be shared with Pacific Neuroscience Institute, I have authority to share this study.' and three buttons: 'Upload selected studies and lab reports' (highlighted in blue), 'Preview Selected Studies', and 'Cancel'.

5. Enter your information into the required fields on the upload page.
6. Click the blue “Upload Selected Studies and Lab Reports” button and wait for the upload progress bar to complete. You will receive a “Your images were uploaded and shared with Pacific Neuroscience Institute” message.
7. To upload any associated reports, click the “Choose File” button under the “Upload a Report” section.

The screenshot shows the success message and upload options. At the top, it says 'ImageShare'. Below this is a green checkmark icon and the text 'Your images were uploaded and shared with Pacific Neuroscience Institute'. There are two main sections: 'Upload another study' and 'Upload a report'. The 'Upload another study' section has the text 'Choose another CD or image file to upload' and a blue button labeled 'Upload another study'. The 'Upload a report' section has the text 'Optionally upload a medical report if one was included with your medical images' and a button labeled 'Choose File' with the text 'No file chosen' next to it.

Your images and reports have been uploaded. Your physician has been notified.

If you already have images in an Ambra account and want to share with us, click to share from your patient portal to Ambra via email:
